

We, fourth-year BSIT students from Pamantasan ng Lungsod ng Valenzuela, are carrying an evaluation of our capstone project, Development and Evaluation of CLIO: Cross-Platform OJT Record Management and Monitoring Application for Pamantasan ng Lungsod ng Valenzuela - Information Technology Department. We are asking you to answer the evaluation tool below by rating the system based on the indicators stated.

DIRECTION: Put an [X] mark on the column that corresponds to your rating.

Evaluation Tool

RATING	DESCRIPTION
5	Strongly Agree
4	Agree
3	Undecided
2	Disagree
1	Strongly Disagree

Table 1.0: Legend for the marks used in the Evaluation Tool

INDICATORS	5	4	3	2	1
Functionality					
Suitability The system is suitable or appropriate for the needs of the client.					
Accuracy The system provides the correct results with the needed degree of precision.					
Reliability					
Maturity The degree to which the system meets the needs for reliability under normal operation					
Compliance The ability of the system to comply with standards, conventions, or regulations related to reliability.					
Usability					
Intelligibility The ability of the system to enable the user to understand whether the software is appropriate and how it can be used for specific tasks and conditions of use.					
Operability The ability of the system to enable the user to operate and control it.					
Efficiency					
Behavior in Relation to Time Assesses whether response times (or processing times) are within specifications.					
Compliance The ability of the system to comply with standards, conventions, style guides, or regulations related to efficiency.					
Maintainability					
Stability Assesses the system’s ability to avoid side effects from modifications made.					
Analyzability Identifies the ease in diagnosing any problems and identifying the causes of the deficiencies or failures.					
Portability					
Adaptability Representing the system’s ability to adapt to different environments without the need for additional actions (configurations)					
Ability to be installed Identifies the ease with which the system can be installed in a new device.
